

TRUERING BUSINESS PHONE SERVICE

WWW.TRUERING.COM

TrueRing is now offering Business Phone Service to businesses of all sizes. Customers switching to TrueRing Business Phone Service can see savings of up to 40% over their existing monthly telecommunications expenses.

The transition is easy—you select the number of phones, the toll-free and local numbers you need, and we take care of the rest.

FLEXIBILITY AND POWER!

TrueRing, a proprietary VoIP solution, includes an extensive offering of modern business features including, toll-free and local number options, free long distance within the continental United States, voicemail to email, fax to email, customizable call routing, and many more; making TrueRing the logical choice for all your business telephone service needs.

TrueRing replaces your existing phone company provided local, long distance, and toll-free telephone services with a Voice Over Internet Protocol (VoIP) based telecommunication solution made available via the same high-speed circuits used for your business data needs. This consolidation of voice and data communications on the same circuits provides the opportunity for significant overall savings.

TrueRing can be interconnected with your existing PBX or Key System, or to new standalone VoIP business phones. In most cases you can keep your business's existing local and toll-free phone numbers, or add new ones. Concerned about quality, or reliability? TrueRing has

been a full-service Internet service and communications provider since 1995, and has the networking expertise to keep your voice and data operating at the levels of reliability and quality that you have come to expect for such mission critical services.

Contact our knowledgeable sales team today to find out how we can assist you with all of your telecommunication needs.
